

## GREEN DIWALI

DAV Centenary Public School, Paschim Enclave, under the able guidance of the Principal Madam Manju Malik, following the guidelines of the Department of education of the government of NCT of Delhi and corresponding department in other states in NCR, formulated a plan to sensitize and educate our students on health hazards and ill effects of breathing polluted air due to fireworks. The School organized various activities at different levels to motivate children to celebrate green, noise and pollution free Diwali.

The students of the primary wing dressed up as elements of nature to advocate the message that festivities should not harm the environment, let's celebrate Green Diwali.

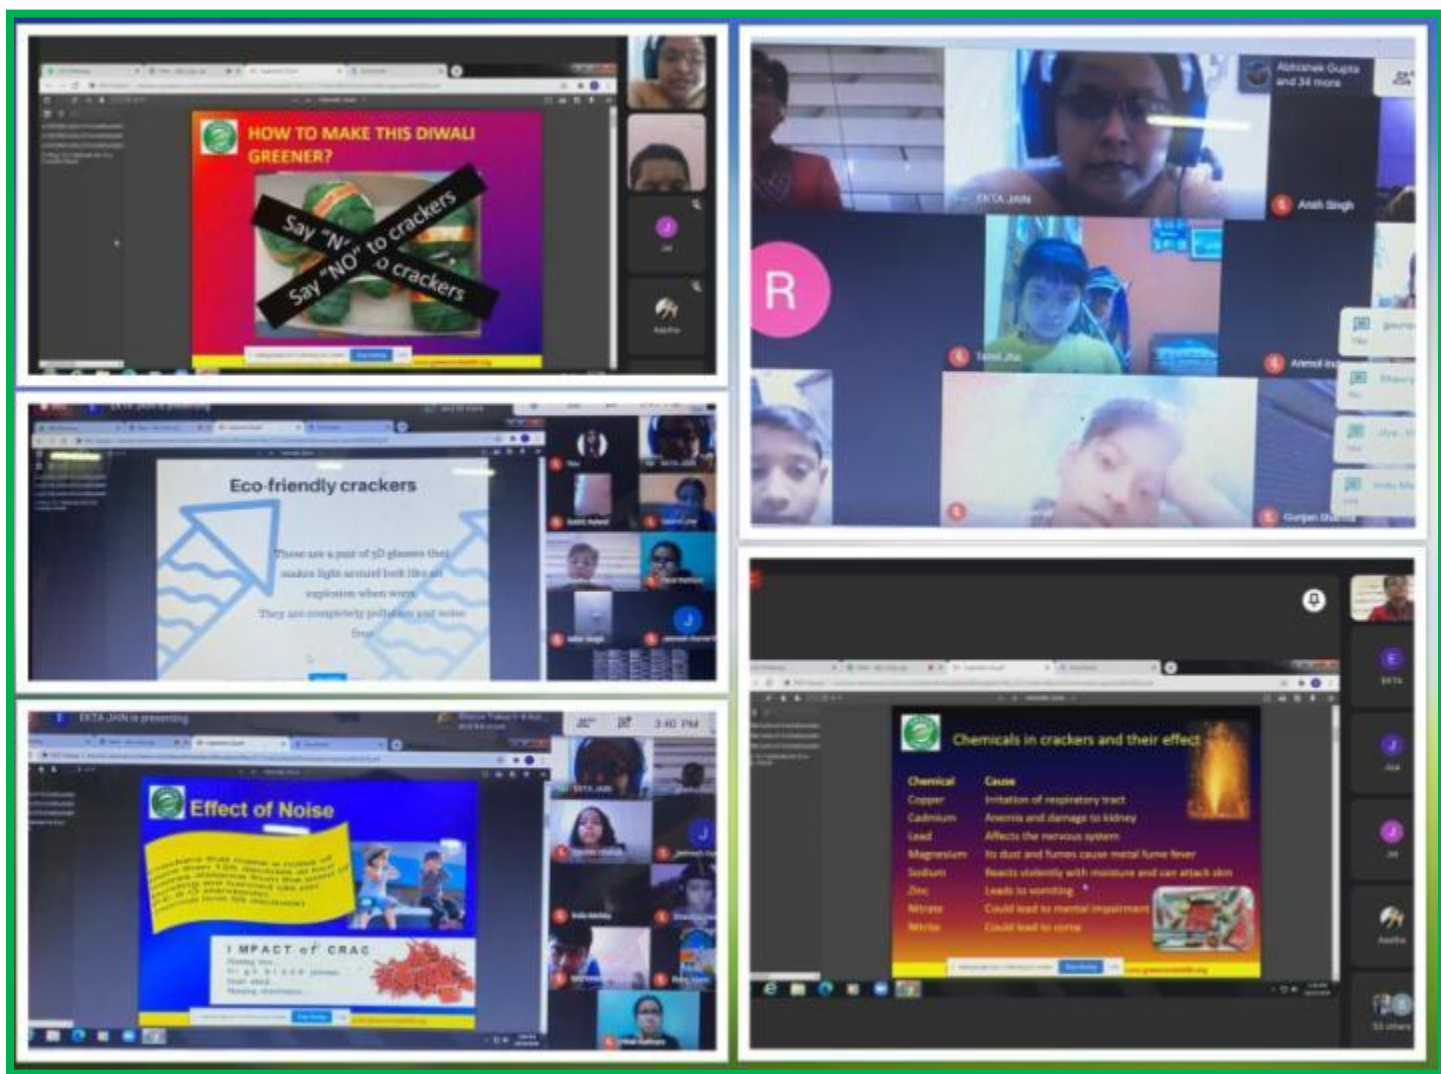

### The Green Brigade

- Students of Classes III & IV dressed up as elements of nature to spread the message - 'Green Diwali Noise Free Diwali'

For students of class V and VI, the school organised a workshop to spread awareness about the health and hazardous effects caused by noise pollution, Air pollution, water pollution which is directly or indirectly caused by fire crackers and by our own unwanted activities. During the session students were given the **Formula-20** on how to relax eyes after over strain. The students were taught many breathing exercises too, also at the time of pandemic how precautions should be followed during this festive session was an important aspect of this session. The session also focused on to celebrate crackers free Diwali. The students were informed about harmful chemicals present in crackers and their hazardous effects on burning not only on us but also on the environment. The session emphasized upon five ways to celebrate eco friendly Diwali. These are : Recycle, Natural Rangoli, Natural Diya, eco friendly crackers, Say no to plastic. During the session students were quite interactive and shared his/her views on green Diwali and took pledge to celebrate pollution free Diwali.

# 'Say No To Crackers'

## Diwali Is The Festival Of LIGHT NOT NOISE

The word diwali comes from sanskrit word deepavali which means 'rows of lighted lamps'. It signifies the triumph of good over evil, righteousness over treachery, truth over falsehood and light over darkness. It is celebrated to honour the victory of lord Rama over king Ravana. This festival is celebrated by hindus, sikhs, Jains etc. All people worship goddess Lakshmi for wealth and wisdom and lord Ganesha for good welfare and prosperity. In this festival people decorate their houses with lights, Diyas etc. But, now a days diwali is the festival for 'Burning crackers'. The babies, old people are most affected. We should not trouble those who can't protest! Earth has enough problems already! We should avoid crackers. It creates noise pollution, crackers creates decibel sound and most people feel numbness in ears which leads to deafness. The harmful gases such as Nitrogen Oxide remain in air unless and until, it does not get enough rain or strong winds. It increases the chances of Asthma attack. Heart patients and people of low immune system are at high risk too. So, lets, join our hands to say <sup>no</sup> to crackers while celebrating festivals. Let's not poison the air which we breathe and better environment.

# SAY NO TO CRACKERS

"Crackers are of no use, they are just environmental abuse"

→ As we all know that our lives are changing drastically from our birth to till now. We have seen many changes around us. But one thing which has not changed, that is the pollution caused by the crackers.

If crackers are burned then we will find lots of caused around us. Some of them are air pollution which will further cause the global warming because due to the presence of green house gases. It cause too much of sound pollution when they are burnt. It also cause the soil pollution too when their waste land on the street after bursting.

The noise pollution is so loud that it can make the ~~eyes~~ temporarily deaf. The smoke coming from the crackers may effect our eyes or throat as the eyes would get red and starts heating and the throat gets sore.

To stop all this we should not burn the crackers. We should make our festival clean and green by lightning our society with the light of diyas and candles. By not burning of crackers and by gifting sweets and gifts.

The last but not the least don't make this festival a polluted festival but make it a sweet, green and clean festival.

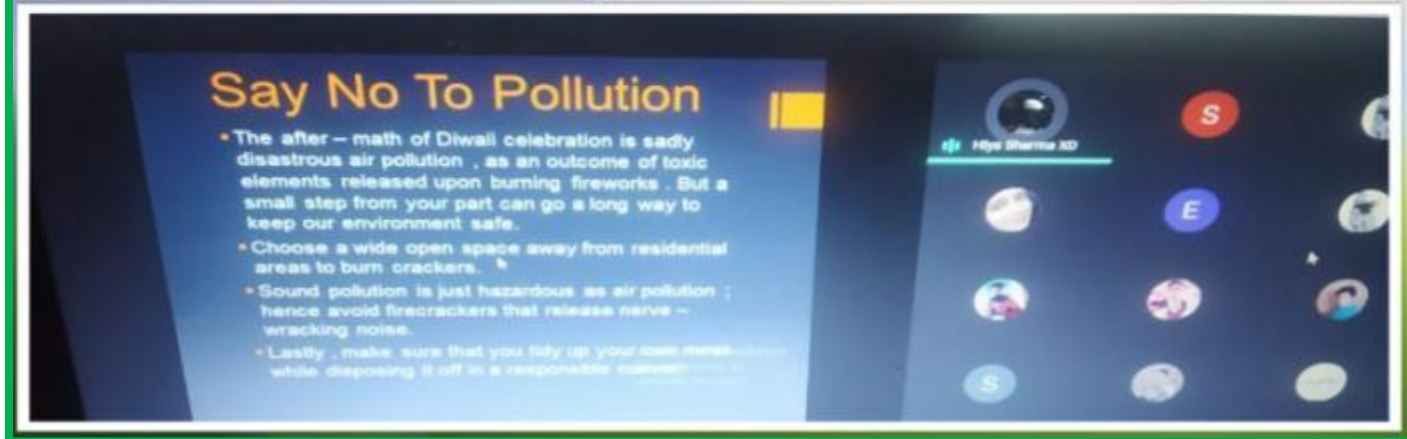

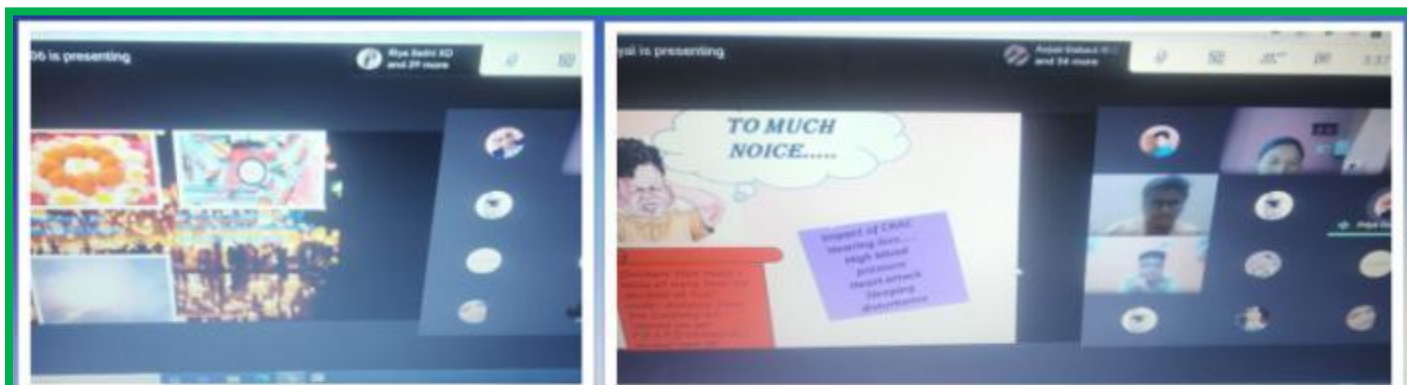

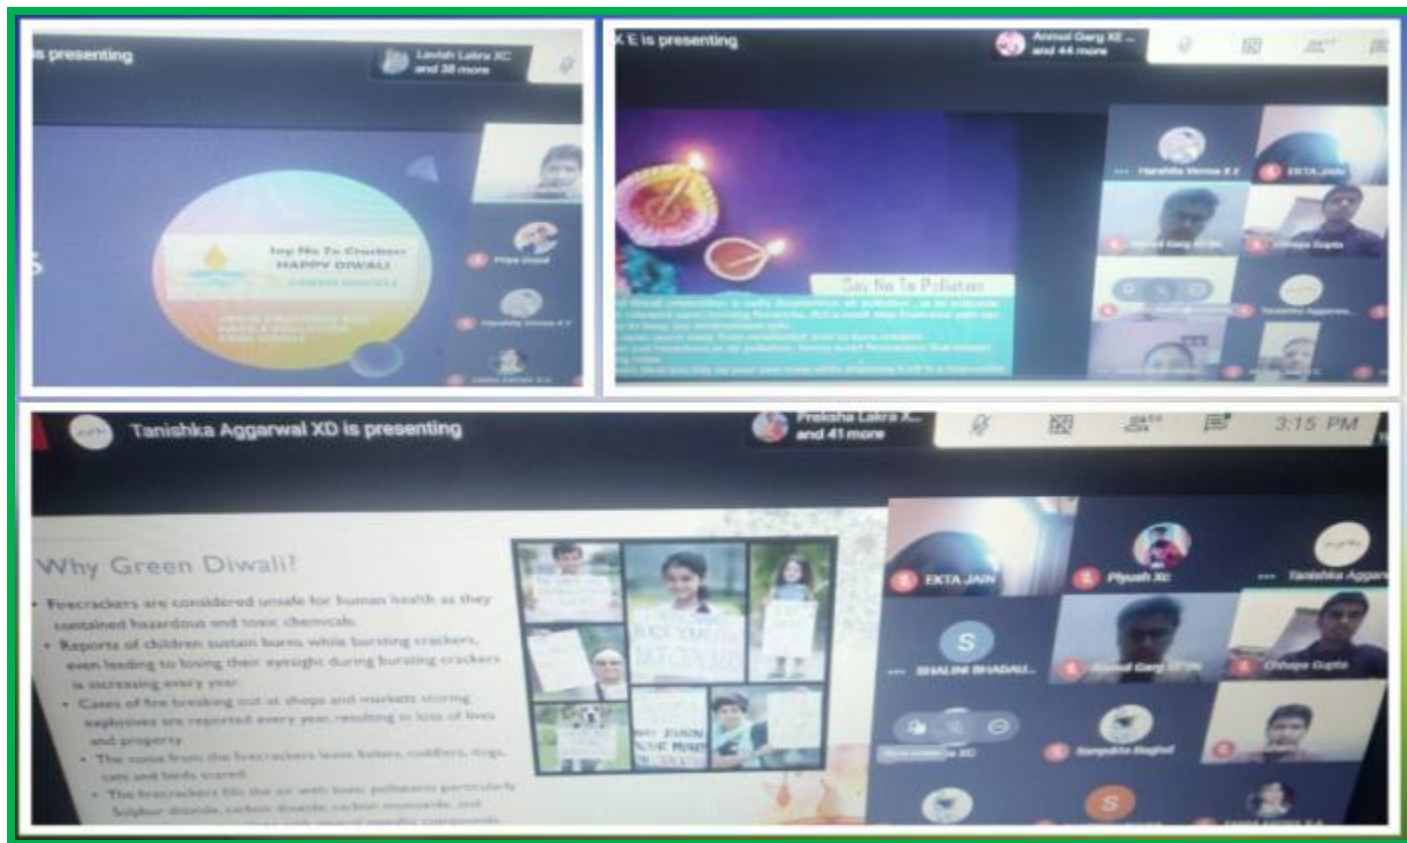

## Article Writing

- Articles on 'Say no to crackers' / Noise Pollution sources and how to control the same
