'Nurture Nature' : Tree Plantation Campaign

(A Report on ECO CLUB Activities)

In an extensive **Tree Plantation Campaign** titled '**Nurture Nature**', plantation of **hundreds of saplings** was undertaken in the school premises as well as the adjoining areas in an effort to make the planet greener. The students carried the plants to the **neighbourhood houses** and planted them with the help of the residents.

The students also sensitized the residents of neighbourhood by taking out a **full-fledged rally, holding placards with slogans** and singing songs for preservation of the environment. The drama club also presented a **street play highlighting the need to save trees**.

In a symbolic activity, all the participants pasted paper-leaves on a hollow tree cut-out and conveyed their **earnest contribution** in making the tree green.

Junior students participated in the venture by presenting a **group dance, dressed in the costumes of trees**.

The teachers and the local residents applauded the efforts of the children and motivated them by supporting their endeavour. **Principal Mrs Manju Malik** concluded the day's activity by congratulating and assuring the students that their **sincere efforts to save environment** will definitely bear fruit; their **future is secure**, if in present, they are concerned about nature.
